### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Regarding claims 1, 8, 15, 21, 39, and 45, the examiner is taking the phrase "each other one of the plurality of segment registers except for the code segment register is ignored for providing segment data" to mean that a code register provides segment data and the other segment registers (including a stack segment register) do not provide any type of segment data at all. This interpretation is based on page 10 of the specification, lines 8-10, which states that **only** the CS (code segment) register is used in a specified (32/64) mode and the data segments are ignored in that they do not provide segmentation information, at all. The prior art of record does not specifically teach or suggest, individually or in combination, a plurality of segment registers including a code segment register and stack segment register where in a first operating mode of a plurality of operating modes indicated by a segment descriptor, which is indicated by a segment selector in the code segment register, each other one of the plurality of segment registers except for the code segment register is ignored for providing segment data, in addition to all the other limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
